API & Services ⇒ People API ⇒ Activer

The screenshot shows the Google Cloud Platform API & Services page. The 'APIs & Services' section is highlighted with a red arrow. A dropdown menu is open over the 'Enabled APIs & services' link, containing options: Library, Credentials, OAuth consent screen, and Page usage agreements. A second red arrow points to the 'Enabled APIs & services' link in the dropdown. A message box at the bottom right says 'Now viewing project "oauth-td-a" in organization "No organization"'.

The screenshot shows the Google Cloud Platform APIs & Services dashboard. The 'Enable APIs and services' button is highlighted with a red box. The dashboard includes a search bar, a time filter for '1 day' (which is checked), and sections for 'Traffic' and 'Errors'.

Branding

App information

This shows in the consent screen, and helps end users know who you are and contact you

App name *
TP Oauth R401

The name of the app asking for consent

User support email *
joseph.cybersec@gmail.com

For users to contact you with questions about their consent. [Learn more](#)

App logo

This is your logo. It helps people recognize your app and is displayed on the OAuth consent screen.

After you upload a logo, you will need to submit your app for verification unless the app is configured for internal use only or has a publishing status of "Testing".

[Learn more](#)

Verification status

ⓘ Verification is not required since your app is in [Testing status](#). You can change your app's publishing status on the [Audience page](#).
